IT & Digital Solutions | Web Technology Operations | Digital Product Coordination

Profile

Computer Science graduate with experience in web development, digital products and technical coordination. Supports website and platform delivery across business requirements, design, UI review, testing and digital workflows; brings product experience through Menuify and a current technical focus on databases, SQL, Python and data engineering fundamentals.

Professional Experience

IT / Web & Technology Operations — **May 2024 – Present**
Capital Academy · capitalacademy.ai
Started in Dubai and now works remotely from Lebanon. Supports website and platform workflows; coordinates requirements, reviews Figma and interface implementation, tracks bugs and tests fixes. Uses AI-assisted tools for research, documentation, content and operational workflows.

Co-Founder | Product & Digital Solutions — **Current**
Menuify · menuify-qr.com
Contributes to product direction, customer requirements, business development and technical coordination for a digital platform supporting QR menus, product catalogs, online and WhatsApp ordering, product information, offers and business analytics.

Web Developer — **2021 – Present**
Freelance
Delivered web projects with a development partner, from requirements through frontend/backend coordination and delivery.

Front-End Developer — **2022 – 2024**
Project-based real-world development work
Frontend delivery for management-system and web projects using React, Angular, TypeScript, APIs and responsive web practices.

Coding Educator — **2022 – 2024**
BrightChamps Academy
Taught programming fundamentals and guided student projects using HTML, CSS, JavaScript, Scratch and Thunkable.

Earlier Internships — **2022 – 2023**
Verozone Solutions EG; Genius House; Jinan University
Front-End Developer Intern (Verozone Solutions EG, Nov 2022 – Jan 2023); Coding Educator Intern (Genius House, Oct – Nov 2022); Data Entry Intern (Jinan University, Jul – Sep 2022).

Education

Bachelor's Degree in Computer Science | GPA: 80/100 — **2020 – 2023**
Jinan University, Tripoli, Lebanon

Technical Foundation

Web: HTML, CSS, JavaScript, TypeScript, React, Angular, Tailwind CSS, responsive web design
Data & systems: SQL, API concepts, system analysis, software testing
Tools: Git, GitHub, Microsoft Word, Excel and PowerPoint; Windows, macOS and Linux
Current technical focus: databases, SQL, Python, data manipulation, ETL/ELT concepts and data engineering fundamentals

Selected Projects

Management Systems – SEG Company: Sam (React, TypeScript), Tom (Angular, TypeScript) and Meters KEnergy (React, TypeScript, API) projects.
Kime – Verozone Company: Frontend contribution to a marketing website using React and JavaScript.
Teaching Projects: Student calculator, robotics, Scratch/Thunkable, and HTML/CSS/JavaScript learning projects.
